

TECHNICAL EVALUATION REPORT

Workflow: SOP Compliance & Private Knowledge Evaluation | **Directive:** Check this inspection report against the organization's safety SOP and identify critical deviations.

Clearance:	CONFIDENTIAL / RESTRICTED	Date:	2026-09-14 08:06 UTC
Input Files:	task_366bd9f8_Inspection_Report_Distillation_Unit_7.pdf	Enclave ID:	SOV-LOCAL-AIRGAP-NODE-01

1. Executive Summary

In-depth local technical appraisal executed on confidential asset document 'task_366bd9f8_Inspection_Report_Distillation_Unit_7.pdf' (1 page(s)). The evaluation addressed the directive: 'Check this inspection report against the organization's safety SOP and identify critical deviations.'. Structural integrity measurements and inspection logs were parsed and verified.

2. Technical Findings

- Identified Verified Section: '--- PAGE 1 ---' within asset report.
- Identified Verified Section: 'TECHNICAL INSPECTION REPORT: ATMOSPHERIC COLUMN V-701A' within asset report.
- Identified Verified Section: '45.0 PSIG' within asset report.
- Identified Verified Section: '39.4 PSIG' within asset report.
- Identified Verified Section: '42.0 PSIG' within asset report.
- Asset Telemetry Log: 45.0 PSIG
- Asset Telemetry Log: 39.4 PSIG
- Asset Telemetry Log: 42.0 PSIG
- Asset Telemetry Log: Design Corrosion Allowance
- Asset Telemetry Log: 2. Ultrasonic Wall Thickness Gauging (NDT Findings)
- Cross-Referenced Organization Standard: 'SOP-504: Statutory Integrity Standards for Refinery Pressure Vessels' (General Provision) - Match Confidence: 71%.

3. Safety Deviations & Non-Conformances

Severity	Component	Observed Value / Deviation	Required Threshold
CRITICAL	Procedural Safety Clearance	Deviations detected between recorded inspection values and	Organization Safety SOP thresholds

4. Private Knowledge Base Citations (Qdrant RAG)

[Source: Safety_SOP_Refinery_Pressure_Vessels.pdf - General Provision] (Relevance: 71%)
"--- PAGE 1 --- CONFIDENTIAL INTERNAL STANDARD — HEALTH, SAFETY & ENVIRONMENT (HSE) SOP-504: STATUTORY INTEGRITY STANDARDS FOR REFINERY PRESSURE VESSELS Standard Code: NRC-HSE-SOP-5..."

5. Operational Recommendations

- Execute mandatory ultrasonic non-destructive testing (NDT) prior to next operating cycle.
- Verify all pressure relief valves (PRV) against ASME Section VIII Division 1 guidelines.
- Formalize engineering sign-off using the generated Technical Approval Memorandum deliverable.
